Network Disclosure Announcement No. 398

Public Notice of Network Change(s), Pursuant to CFR 47, subsections 51.325 - 51.335.
U S WEST Communications' Internet address: <http://www.uswest.com/disclosures>.

Custom Local Area Signaling Services (CLASS) Continuous Re-dial Deluxe Enhancement Update 1/22/98

Original Disclosure Date: November 11, 1997
Update to disclosure #382

This document provides an update to the locations where U S WEST Communications plans to deploy Custom Local Area Signaling Services (CLASS) Continuous Re-dial Deluxe Enhancement. The following summary and interface specifications were announced in Network Disclosure #382 and are reiterated below as this document completely replaces #382. An asterisk in the left margin denotes a change or addition from the previous release.

Summary:

This disclosure announces U S WEST plans to deploy an enhanced Continuous Re-dial Deluxe (CRD) starting in December 1997. Continuous Re-dial Deluxe or Enhanced Busy Call Return (NORTEL terminology) is a modification to the existing switch based CLASS * 66 Continuous Re-dial feature currently deployed in U S WEST. This CRD feature replaces the existing network switch busy tone the customer hears with a new continuous re-dial announcement containing a front end recorded busy, a continuous re-dial voice prompt, followed by more recorded busies.

**Location and
Timing of Deployment**

Please see the attached schedule for the updated deployment list of Continuous Re-dial Deluxe (CRD). Updates to this disclosure will be provided as additional locations are identified.

Pricing:

This interface is will continue to use the existing Continuous Re-dial tariff filed in all 14 U S WEST states.

Interface Requirements:

Interface specifications can be obtained by referencing the following Bellcore technical documents:

GR-2948 CORE - Prompted Automatic Callback FSD (Feature Specification Document) 01-02-1255 Issue 1 December 1996. \$100.00

TR-NWT-000215 -CLASS feature : Automatic Callback FSD (Feature Specification) 01-02-1250 Issue 3, June 1993 \$115.00

These documents can be obtained by writing or calling :

Bell communications Research, Inc.
8 Corporate Place, Room, 3A-189
Piscataway, NJ. 08854-4196
1-800-521-CORE

Additional Information:

U S WEST testing and evaluation of Continuous Re-dial Deluxe indicates that the feature's modification of the normal network busy tone interface potentially impacts those CPE devices which key on the busy tone for their functionality. These devices may include modems, fax machines, alarm/security systems, Point of Sale (POS) terminals, ADSI screen phones, telephones with auto re-dial and PBX key systems with auto re-dial features.

Customer Premises equipment vendors/manufacturers or enhanced services providers desiring technical information in conjunction with this notification may contact:

Mr. James Reynolds
U S WEST Communications
5090 North 40th Street, Room 280
Phoenix, Arizona 85018
1-602-351-5292

NOTE: This announcement has been released in accordance with the FCC Rule 51.333(a), Certification of Short Term Public Notice.
